

RMB CEMS Training Workshop

May 21-22, 2013

Duke Energy Office – Indianapolis, Indiana

RMB will conduct a two-day continuous emissions monitoring system (CEMS) training program that will focus on the practical impacts of the Part 60 and 75 CEMS requirements. The agenda will also include discussion of the monitoring options related to EPA's new National Emission Standards for Hazardous Air Pollutants from Coal- and Oil-fired Electric Utility Steam Generating Units (a.k.a., EGU MACT or MATS rule). RMB is uniquely qualified to provide this service given our understanding of the 40 CFR Parts 60 and 75 CEM regulations and associated regulatory guidance documents, and our extensive experience in auditing electric utility CEM programs, and the CEMS related research and regulatory support that we provide for groups like EPRI and UARG.

Tuesday, May 21, 2013 (8:30-4:00)

CEMS and Regulatory Overview
CEMS Fundamentals/ Technology
Appendix D & E
Part 75 QA/QC Requirements
Part 75 Rule Revisions
